THE QUANTUM FACTOR OF ENERGY (CORRELATE TO MY THEORY OF TIME DIMENSION)

**EFFECTIVE ON AND FROM RETROSPECTIVE EFFECT OF THE BĒDA.
NOTIFICATION THROUGH E-MAIL OR THROUGH MY PREVAILING U.R.L.**

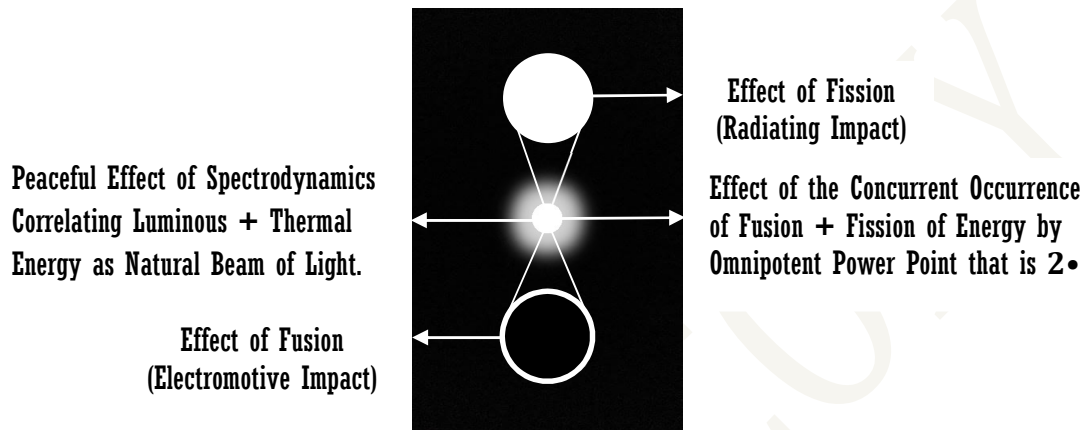

CONFERRED TO HUMANKIND FOR FAIR AND SQUARE OF SCIENCE AND PEACE.

THE QUANTUM FACTOR OF ENERGY

The Bēda is the encyclopaedia of cosmology. According to Bēda the quantum means an unbounded cell or cellular packet of energy, having a variant nucleus of diagonally reverse conical spin, correlating both the endless (∞) extent of tiniest and vast field value, called **universe** (Brahmānda). This is the logic of indivisibility of atom. The $\text{Spin}1C0 \equiv 0^\times$ itself is the diagonally reverse conic spin where power value (0^\times) of energy = unit value of time in cosmosecond.

THE GRAPHIC FORM OF THE DIAGONALLY REVERSE CONIC SPIN:

Time dimension **itself** is the **universal constant** through equitable factor of the magnitude of time per unit of energy is equal to the magnitude of energy per unit of time, by the **atomic law** ($\bullet = 0 = \infty$) of the universal exchange of energy towards both the endless extent of tiniest and vast values, as **spectrodynamics**.

WHEREFORE:

Energy $\propto \frac{1}{\text{Time}}$ = The dimension of the Power Point (\bullet) of the diagonally reversible conical spin, parentetic to $\text{Spin}1C0 \equiv 0^\times$, complying mathematical equation of the cross referential division followed by addition of the sequence of the basic divisible numerals as illustrated in my Theory of Time Dimension correlated with The Universal Constant since long past.

WHERE:

The decimal (Tenth) is the faceted singularity of the value of the **power point** that is **2•** (Analog) wherein do not confuse with the total decimal point value.

AND WHERE:

Energy value is always **constant** by Time value and vice versa according to input (Fusion) of the energy exchange AND Energy value is **inconstant** by Mass value according to output (Fission) of the energy exchange, encompassing both the endless (∞) extent towards tiniest and vast, called universal cycle of energy. This is the denotative field value of the **wholeness** of the **Zero (0)** of entirety.

THE QUANTUM FACTOR OF ENERGY

THEREBY INFINITE CONSERVATION OF ENERGY OF UNIVERSE:

Energy $\propto \frac{1}{\text{Time}}$ is **constant** by the certainty principle.

Energy $\propto \text{Mass}$ OR Energy $\propto \frac{1}{\text{Mass}}$ is **inconstant** by lacking of certainty principle.

- ∴ In perspective to both the endless (∞) extent of tiniest field value and vast field value, in context of wholeness of entirety; it is certain that energy neither created, nor can be destroyed, not either can be divided by the mathematical law of the **power point** ($2\bullet$) to ensure peace against fatality of mass homicide. This is the significance of Spectrodynamics of Time•Energy Transposition as stated in my Theory since long past. This is authentically called ubiquity.
- ∴ Energy = $2\bullet^{\text{Power Value}}$ encompasses both conservation and conversion of energy as per Spectrodynamics is called decimal.
- ∴ Energy = $2\bullet^{03\infty}$ is the infinite fundamental set value of the power value of emission of energy, triggering fission (Bit) as said, namely Spectrodynamics.
- ∴ Energy = $2\bullet^{01\infty} = \text{Time}$ is constantly holding equitable balance of power by infinite value, triggering fusion (Pause) as said, namely Spectrodynamics.
- ∴ $2\bullet^{\bullet=0=\infty}$ defines infinite range of pixel as infinite range of the energy exchange towards both the endless (∞) extent of tiniest and vast field value of infinite circumference of the wholeness, caused by the Spin1C $0 \equiv 0^\times$ as stated, namely atomic law of the indivisible as well as inseparable atom.
- ∴ Energy = $2\bullet^{\text{Power Value}}$ per set value of quantum field towards both the endless (∞) extent of tiniest and vastness.
- ∴ **Energy = $2\bullet$ (Power point)** is the **Universal Constant** as shown in graphic.

CONCLUSIVE STATEMENT:

The Ōm̄ is the mnemonic wordle of the monosyllabic gist of the time dimension.

My Theory of the Theory of Time Dimension (Grand Unified Theory) duly encompassess faculty of science and philosophy of peace as significantly said.

Mathematics is the epitome of irrefutable logic. Physics is the best finder of the relation between creation and its cause of the root of the mother nature by the application of math. Peace is the footprints of time by the impact of psychology.

Education is the process of forming rational mind for being wisely noble. Wishing a healthy planet governed by the irrefutable logic of the wisely noble.

$2\bullet^{03\infty}$ is the infinite fundamental set value {Time, Energy and Field} of the power value of the emission of energy, triggering fission (Bit) as constantly said, namely Íŝa of the Spectrodynamics, encompassing both the endless (∞) extent

towards tiniest field value and vast field value of the infinite circumference of the wholeness of the Zero (0) as both the subset {0} and the superset {0}, as authenticated by the certainty principle of the trilogy of mathematics for justly understanding irrefutable logic by all academic institutions of the world.

The Zero (0) is the constant power value of the power point (2•) of the endlessly variant magnitude of the Spin1C $0 \equiv 0^\times$; resultant to the rate of time span of the Time•Energy Transposition, which is called cosmosecond, duly validated by the mathematical law of the decimal (Tenth) as stated by Bēda since long long past. Decimal does not lie. This is the cause of the point of no return in space science.

The Power Point (2•) has been mentioned in the "Śbētāśbatara" Upanishad as "Sampatatrai Ēkah"- 36/3 chapter. The identical same has been expressed by Adi Sankaracharya as "Ēkamēbādbitīyama". The identical same has been work out logically as well as scientifically by me as the **Universal Constant**.

The axiomatic tenet of Bēda as guiding principle towards Power Point (2•) is "Ahaṁ Brahmāsmi". Reference: My article vide Intellectual Legacy of The Bēda.

The Quantum Factor of Energy duly encompassess the faculty of science and philosophy of peace for all sentient and insentient beings, subjected to as and when or as and where justly applicable.
